Lenovo Computer Locks

Catalog

The cost of a lost or stolen company device goes far beyond the value of the hardware alone. The consequences of equipment being acquired by a malicious third-party could cost a company their reputation, intellectual property, and millions of dollars in fines and data loss.

Lenovo's Computer Locks provide a simple solution to a complex problem by physically fastening devices in place with ultra-tough cable locks, so that nobody can tamper with or steal your device when you're away from your desk.
